

Polish energy storage power station supplier

How big is Poland's energy capacity?

According to data from the Energy Market Agency, at the end of November 2024, Poland's installed capacity was about 20.7 GW, growing year-on-year by almost 28 percent, and the installed capacity of wind power plants was about 10.2 GW, increasing year-on-year by about 8 percent.

Where will LG Energy Solution supply lithium iron phosphate batteries?

It also noted that the project will be supplied with locally manufactured grid-scale lithium iron phosphate batteries at LG Energy Solution's production facility in Poland. LG Energy Solution will also be in charge of the project design and construction on a turnkey basis. Completion of construction is scheduled for 2027.

What is PGE Group's energy storage portfolio?

Today, PGE Group's energy storage fleet stands at nearly 7 GWh. It is comprised almost exclusively from pumped hydro storage facilities aside from three single-digit-megawatt battery energy storage systems. The planned investments will help diversify the utility's storage portfolio.

How many energy storage facilities will PGE Group add in 2035?

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will be supplied with locally produced LG Energy Solution's grid-scale systems.

"Our BESS (Battery Energy Storage System) acts like a shock absorber for the entire network," explains Dr. Kowalski, lead engineer at ENERGA Storage Solutions. "It's not just about storing ...
