Updated June 2025: We've added a Bluetti model, honorable mentions from EcoFlow and Acer, and a testing and FAQ section. Portable power stations can be very expensive, but discounts, sales, and deals are common. If you can afford to wait, you can likely get your chosen power station for less than the listed MSRP.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

How long does a portable power station take to recharge?

That depends on the capacity of your portable power station, the wattage of your solar panels, and the weather. For example, a 1,000Wh power station that's receiving a consistent stream of 200 watts of power from a solar panel would take about 5 hours to recharge ($1,000/200=5$). Are portable power stations weather resistant?
