

Power supply for small communication base stations in Laos

What is a 3G base station converter?

In a 3G Base Station application, two converters are used to provide the +27V distribution bus voltage during normal conditions and power outages.

What types of power systems are used in communications infrastructure equipment?

Communications infrastructure equipment employs a variety of power system components. Power factor corrected (PFC) AC/DC power supplies with load sharing and redundancy (N+1) at the front-end feed dense, high efficiency DC/DC modules and point-of-load converters on the back-end.

How to choose a power supply topology for a multi-output DSL converter?

Selection criteria for the power supply topology in multi-output DSL converters include requirements for performance (high efficiency and tight load and line regulation), simplicity, low cost and a small footprint with a low profile. High performance is achieved by selecting the appropriate topology and control circuit.

MORNSUN has designed entire collections of power supplies and related electrical components, which are all known in the industry for their high reliability and quality. In particular, MORNSUN ...

News from shupeidian.bjx .cn: On December 3, the "Lancang" EMU train slowly departed from Vientiane Railway Station, the capital of Laos, marking the operation of the whole line of ...

Combine your radio with a reliable Comms Series Power Supply and custom-fitted cover to create an attractive space-saving base station. Use THIS reference tool to find your radio, then order ...
