

Price of AC power generated by inverter

How many watts does an inverter generator produce?

Small inverter generators are great for camping or fishing trips, providing 1,500 to 2,500 watts of power. Medium inverter generators are suitable for RVs and campers, offering 2,500 to 5,000 watts. Large inverter generators are best for home use during blackouts. They produce more than 5,000 watts and can power essential appliances.

How much does an inverter generator weigh?

Remember that a generator's size and weight are proportional to its power capabilities. The higher the wattage, the larger and heavier the generator. On average, inverter generators weigh less than 100 pounds, whereas standard generators can be significantly heavier, sometimes reaching hundreds of pounds.

How much does an inverter Generator cost at Lowes?

A typical price for a Inverter Generator is \$819 but can range from approximately \$439 to \$2,799. These Inverter Generators are the most popular among Lowe's entire selection. While these are popular, we recommend ensuring that the Inverter Generators you consider have the right mix of features and value.

Can an inverter generator run an air conditioner?

Yes, an inverter generator can run an air conditioner, provided the generator's power output is sufficient. To handle the starting and running power needs of a standard RV air conditioner, you'll need a generator rated at least 3,600 watts.

Which inverter generator should I buy?

Our best overall pick is the Westinghouse 4,500-watt inverter generator. It's able to run up to 18 hours on a 3.4-gallon tank with dual fuel technology. With its low oil shutdown, fuel is conserved for efficient usage, so you're always able to get the most out of your generator.

Can a 30 watt inverter generator power an AC unit?

A 30-amp (3,600-watt, 120-volt) inverter generator can power an AC unit but likely won't support much beyond that. If you need to power your whole house in an emergency--including AC, lights and a refrigerator--you'll need a generator capable of producing closer to 10,000 watts or more.
