

Price of centralized energy storage power station

In 2023 alone, China's large-scale storage system prices halved from $\text{\$}1.4/\text{Wh}$ to $\text{\$}0.6\text{--}0.7/\text{Wh}$, while U.S./European markets saw a 35% dip to $\text{\$}1.15\text{--}1.3/\text{Wh}$ [1]. But how low can they go? ...
