

Professional power supply for various communication equipment base station modules

What types of power systems are used in communications infrastructure equipment?

Communications infrastructure equipment employs a variety of power system components. Power factor corrected (PFC) AC/DC power supplies with load sharing and redundancy (N+1) at the front-end feed dense, high efficiency DC/DC modules and point-of-load converters on the back-end.

What is a power supply system?

The power supply systems thus secure the entire transmission technology (LTE, 5G, VOIP, TV, servers, etc.) against network failures. They are precisely tailored to the requirements of the telecommunications network operators. These include:

What is a preferred power supply architecture for DSL applications?

A preferred power supply architecture for DSL applications is illustrated in Fig. 2. A push-pull converter is used to convert the 48V input voltage to $\pm 12V$ and to provide electrical isolation. Synchronous buck converters powered off of the +12V rail generate various low-voltage outputs.

What is a 3G base station converter?

In a 3G Base Station application, two converters are used to provide the +27V distribution bus voltage during normal conditions and power outages.

What is a multi-output power supply design?

Multiple output designs may also employ a complex regulation scheme which senses multiple outputs to control the feedback loop. Voice-over-Internet-Protocol (VoIP), Digital Subscriber Line (DSL), and Third-generation (3G) base stations all necessitate varying degrees of complexity in power supply design.

How many kW does a telecom power supply have?

Telecom power supplies with rectifier (72 kW right, or 90 kW left) and inverter (7.5 kVA) in one system as well as 10" touch display of the MCU 3000 system controller built into the cabinet door.

ABOUT HUARI Huizhou City Huari Communication & Technology Co., Ltd is a High-Tech private enterprise specializing in R&D, manufacturing two way radio accessories, communication ...

It is a fixed point of communication for customer cellular phones on a carrier network. Discover high-quality connectors for base station power supplies by Amphenol LTW, ensuring durability ...

Contact Mingzinc for a free consultation and let our engineers help you select the right modular power supply --from standard modules to custom-designed solutions for your communication ...
