Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea - to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

Can dual-glass solar panels increase solar energy production?

Installing dual-glass panels on a reflective surface, like a white rooftop, can increase solar energy production. That's because nowadays, dual-glass solar modules use bifacial cells throughout, and this power is generated from both sides of the panel instead of just one. What is a dual glass solar panel?

In contrast, dual-glass solar panels replace the backsheet with a second layer of tempered glass on the rear side of the module. The combined strength of using two sheets of glass makes the solar panel less prone to becoming deformed or for microcracks to form in the cells.

Why did Agora solar choose a glass-glass production line?

Agora Solar deliberately chose a production line that can be converted to other formats in a short time, noting that it also plans to manufacture semi-transparent, glass-glass modules for building-integrated photovoltaic (BIPV) systems.

Should you use dual-glass solar modules for rooftops?

Robustness and reliability are critical for solar professionals looking for resilience in solutions designed to provide a greener future. Thus, using dual-glass solar PV modules for rooftops offers the opportunity to increase the energy efficiency of commercial and residential buildings. What are dual-glass solar modules?
