

Slovenia Valley Power Energy Storage Device Supply

What are the main sources of electricity in Slovenia?

A paid subscription is required for full access. Nuclear power is the most used source of electricity production in Slovenia. In 2022, nuclear power plants accounted for 42 percent of total electricity generation. Coal-fired and hydropower plants followed, each making up approximately 24 percent of power production that year.

What is a pumped storage power plant?

Pumped Storage Power Plants are an important element in developed power supply systems with high percentage of continuous non-variable power generating, where surplus energy occurs during the period of low consumption and simultaneously there are great needs for peak energy.

Where is Ngen deploying the largest battery storage units?

Developer NGEN is deploying the largest battery storage units in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too.
