

Slovenia's wind power system

How many wind turbines are there in Slovenia?

A solar power plant with a capacity of 6MW opened in 2023 at Brezice, linked to the hydro power plant. Slovenia had just 2 wind turbines in 2022. Onshore wind energy potential for Slovenia is typical of central and eastern Europe.

What is the current energy use and state of renewables in Slovenia?

Current energy use and state of renewables in Slovenia. 2050 scenario based forecast of energy use for industry, transport and other use. Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

What are Slovenian characteristics and possibilities for the growth of renewables?

Slovenian characteristics and possibilities for the growth of renewables. Largest Slovenian potential has solar power, wood and water is over 90 % exploit. 1. Introduction One of the main goals of energy policy in the European Union (EU) is to gradually increase the use of renewable energy sources (RES) and also to improve energy efficiency.
