

Solar 4-inch water pump inverter

What is a 4 kW solar pump inverter?

4 kW solar pump inverter with MPPT tracking technology for sale, AC output current 9A at 3-phase, DC voltage range (280V, 750V). Output frequency 0~400 (Hz) and power factor ≥ 0.99 . The pump inverter supports AC and DC input, storage temperature (-20 $^{\circ}$ C, 60 $^{\circ}$ C) and ambient temperature (-10 $^{\circ}$ C, 40 $^{\circ}$ C).

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor ≥ 0.99 .

How to choose a solar pump inverter?

Understand the rated power of the water pump. Normally, the rated power of the solar pump inverter should be slightly more than or equal to the rated power of the water pump to ensure that the pump can be operated normally. For instance, if the water pump's rated power is 2kW, the selected inverter should have a rated power of 2kW or higher.

Does a 1 hp submersible water pump need a solar inverter?

A 1 HP AC submersible water pump needs AC power/electricity to function. We can't connect it with the solar panels directly as DC electricity cannot be used to power these water pumps. Therefore, a solar inverter is also installed along with solar panels in this type of solar water pump.

How much power does a solar pump inverter have?

1.5kW solar pump inverter for sale, with AC 3.8A output current at 3-phase, 380V, DC voltage range (280V, 750V), and recommended DC MPPT range (350V, 750V). With IP20 protection class, the solar pump inverter works at (-10 $^{\circ}$ C, 40 $^{\circ}$ C). The solar pump inverter supports AC and DC input, the power factor is ≥ 0.99 , and the humidity is less than 95%RH.

What is a solar pump inverter?

The solar pump inverter is an off-grid inverter that doesn't rely on the grid and operates independently of the load. The traditional off-grid inverter requires a battery, which costs about 30% of the system's cost. The system has a life span of only 3-5 years, which can affect your ROI.

Quality and energy efficiency are our hallmarks that instill pride in us as a pioneer in manufacture of many types of solar water pumps. Our pumps are not only energy efficient, but also long ...

Product Specifications -- Product Description Overview Quick Details Warranty: solar panel 10 year, inverter

Solar 4-inch water pump inverter

2year, pump 1 year Place of Origin: Guangdong, China Brand Name: Hober ...
