

A Solar tracker is a system or device that orients various photovoltaic and solar thermal panels toward the sun. It ensures that the direct beam from the sun is incident normal to the surface ...

Dual Axis Solar Tracker Controller equipped with high-precision sensors to track the sunlight in real time, capable of leveling in case of wind, returning to position on cloudy days or at night, ...

Solar trackers are designed to optimize the angle of solar panels, ensuring they receive maximum sunlight throughout the day. Unlike fixed-tilt solar panels, which remain in a stationary position, ...
