

Solar power generation and energy storage in Austria

How much solar power does Austria generate?

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

How much does a photovoltaic battery storage system cost in Austria?

The total inventory of photovoltaic battery storage systems in Austria therefore rose to 11,908 storage systems with a cumulative usable storage capacity of approx. 121 MWh. For 2020, a price of around EUR 914 per kWh of usable storage capacity excl. VAT was charged for PV storage systems installed as turnkey solutions.

What opportunities are there in the renewables sector in Austria?

For more information about opportunities in the renewables sector in Austria, please contact Marta Haustein, Senior Commercial Specialist at CS Vienna: marta.haustein@trade.gov. Austria invests \$1.18 bn to produce 100% clean electricity by 2030. Wind, solar, hydro, biomass, storage technologies, smart distribution systems offer ...

How big is Austria's hydraulic storage power plant capacity?

In 2020, Austria had a historically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GW and gross electricity generation of 14.7 TWh. This storage capacity has already played a central role in the past in optimising power plant deployment and grid regulation.

How many natural gas power plants are there in Austria?

There are currently 16 natural gas power plants in Austria and 3.4 GW power made by pump hydro storage powerplants. E-Control is the regulatory authority in Austria responsible for the electricity and gas industry. The TSO and the larger DSO's are mainly owned by the federal and regional governments.

How many solar panels does Austria need?

With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany. Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.
