

Somalia outdoor power supply new model

Does Somalia have a power grid?

There is no national power grid. Diesel generators are the primary source of electricity. Most generators and distribution equipment are old and inefficient, resulting in a low-quality electricity supply. Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa.

What kind of energy is used in Somalia?

Domestic use of energy: Most Somali households use fossil fuels such as charcoal and firewood for household cooking. Charcoal (47.9 percent) and firewood (41.3 percent) are the two energy sources most used for cooking, while gas or electricity are only minimally used.

Does Somalia have wind power?

Wind Energy: Studies suggest Somalia has high potential for onshore wind power and could generate between 30,000 to 45,000 MW. A pre-conflict 1991 article in the scientific journal *Solar Energy* assessed that "the wind resource appears suitable for power production in 85 percent of the country."

How much does electricity cost in Somalia?

Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa. Somalia has higher tariffs than neighboring countries Kenya and Ethiopia, ranging from 50-125 cents/kWh compared to 0.15 cents/kWh in Kenya and 0.6 cents/kWh in Ethiopia. Somalia's energy sector is considered promising for growth and investment.
