

Southern Energy Storage Project

Does Southern Power offer battery-based energy storage?

ATLANTA, March 29, 2022 /PRNewswire/-- Southern Power, a leading U.S. wholesale energy provider and subsidiary of Southern Company, today announced that battery-based energy storage projects at its Tranquillity and Garland solar facilities in California are now fully operational.

Are solar and storage projects a good idea for Southern Power?

"These co-located solar and storage projects are a first of their kind for Southern Power," said Southern Power President Bill Grantham. "We expect these new battery-based energy storage projects to enhance California's grid reliability.

What is a decommissioning plan for a battery energy storage project?

The project team developed a decommissioning plan that includes a mix of auction, disposal and repurposing equipment. "Decommissioning a battery energy storage project is a first for SCE, and the technicalities were complex," said Md Arifujjaman, SCE lead senior engineer for the project.

Environmental and social monitoring reports provide the status of environmental or social issues or mitigation measures related to project implementation. This document dated May 2025 is ...
