

Sudan has a lot of wind power in its communication base stations

Can Sudan use wind energy?

Though Sudan's past experience with wind power industry has not been successful or strictly speaking has not been exploited properly, the country still has very promising potential for using wind energy. A wind measurement campaign in year 2002 investigated and identified the feasibility of electrical power generation by wind energy.

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

What can Sudan do with abundant onshore wind?

With abundant onshore wind, Sudan can adopt successful African strategies and attract regional and international energy initiatives, such as the Africa-EU partnership program, the Africa Clean Energy Corridor, and Power Africa.

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in Sudan.

How will hydroelectricity affect Sudan's energy sector?

Combining hydroelectricity with solar, wind, and geothermal energy will substantially increase power production in Sudan and should eliminate many of the problems Sudan's energy sector is currently experiencing.

What is a good start for a wind power project in Sudan?

One good start where both Sudan decision makers and any respective stakeholders may want to begin with and adopt for any potential Wind Power project, would be the Planning Policy Statement 18 "Renewable Energy" (PPS 18). The objectives of the policy include:

South Sudan is the youngest nation on this Earth with a population of 8.26 million. Only 1% of which, including the government, have access to electricity. Modern forms of energy are few ...
