

Swedish advanced photovoltaic panel size

What is the average PV system size in Sweden?

The number of systems at the end of each year, and the corresponding average system size are presented in Table 6. As seen at the end of 2023, Sweden had an average PV system size of about 15.8 kW. This relatively small system size illustrates that the Swedish PV market mainly consists of small, distributed PV systems.

How much does a PV system cost in Sweden?

The total price was 11.70 SEK/Wp. There have been some significant changes in the Swedish residential PV market between 2020 and 2023, for example, the size of the annual market and the number and size of companies working with PV system installations.

How much power does a PV system have in Sweden?

The official statistics provided by grid operators and collected by the Swedish Energy Agency only classify PV system sizes (power) into three ranges: 0-20 kW, 20-1000 kW, and >1000 kW. Table 7 summarises the total installations at the end of 2023 based on this data source.

Where are PV installations located in Sweden?

Geographical Distribution and Market Segmentation: The report reveals that the majority of PV installations are concentrated in the southern part of Sweden, with Gothenburg, Uppsala, and Linköping leading in total installed capacity.

Which segment dominates the Swedish solar power market in 2024?

The solar rooftop segment continues to dominate the Swedish solar power market, holding approximately 55% market share in 2024.

How big is Sweden's PV capacity in 2023?

Total Installed PV Capacity: By the end of 2023, Sweden's total installed PV capacity reached nearly 4 000 MW, a 67% increase from the previous year. This growth continues the strong upward trend seen over the past five years, underscoring Sweden's commitment to expanding its renewable energy portfolio.
