

Syria's new outdoor power supply

With sanctions lifted, Syria looks to solar power as more than a patchwork fix to its energy crisis. Syria is working to rebuild its energy sector after years of civil war and crippling ...

Syria's renewable energy sector is evolving rapidly, with outdoor energy storage solutions becoming critical for stabilizing power supply in remote areas. This article explores the market ...

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these probl...
