

Ukraine Energy Storage Power Station Project

How many battery energy storage systems are there in Ukraine?

The project includes six battery energy storage systems of varying capacities - from 20 to 50 MW each - connected to the Ukrainian power grid. Collectively, the systems have the capacity to store 400 MWh of electricity, enough to power 600,000 Ukrainian homes for two hours.

What does DTEK's new energy storage system mean for Ukraine?

The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system. DTEK Group aims to commission the new storage systems by September 2025.

Will DTEK build a 200MW battery energy storage system in Ukraine?

DTEK unveils EUR140m plan for 200MW battery energy storage systems in Ukraine. (Credit: DTEK) DTEK Group, a private investor in Ukraine's energy sector, has announced a EUR140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined capacity of 200MW.

How much electricity can a fluence system store in Ukraine?

Collectively, the systems have the capacity to store 400 MWh of electricity, enough to power 600,000 Ukrainian homes for two hours. The storage systems, leveraging Fluence's innovative storage technology, are expected to enhance grid stability and resilience in Ukraine through advanced grid-forming capabilities.

When will DTEK's new energy storage systems be operational?

DTEK Group aims to commission the new storage systems by September 2025. Once operational, these energy storage facilities will provide ancillary services to Ukraine's Transmission System Operator Ukrenergo.

Can Fluence improve grid stability & resilience in Ukraine?

The storage systems, leveraging Fluence's innovative storage technology, are expected to enhance grid stability and resilience in Ukraine through advanced grid-forming capabilities. The project's construction was completed in only six months, significantly faster than the industry average for projects of such complexity.

23 hours ago: A complex of energy storage systems capable of powering 600,000 homes for two hours has begun operation in Kyiv and Dnipropetrovsk Oblasts, Energy Ministry reported on ...

1 day ago: The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in ...

10 hours ago: The complex is located in two regions of Ukraine and was built by DTEK in partnership with the American company Fluence Energy. Investments in the project amounted ...
