

Vietnam's photovoltaic power generation must be equipped with energy storage

Do energy storage systems exist in Vietnam's power system today?

This paper provides an up-to-date review of these storage technologies and energy storage systems in Vietnam's power system today. Finally, there are a few perspectives on the opportunities and challenges of these storage systems in Vietnam power systems today.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How is solar energy regulated in Vietnam?

Vietnam's solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth.

What are the requirements for a battery project in Vietnam?

The Vietnamese authorities also decided that battery projects under the FiT scheme must have at least 10% of a PV plant's capacity and offer at least 2 hours of storage. According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024.

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals. 2. What challenges is Vietnam's solar power sector facing?

Why does Vietnam have a high solar capacity?

The introduction of attractive feed-in tariffs in 2017 spurred a surge in solar installations, leading to a dramatic increase in capacity and investment. As a result, Vietnam now boasts one of the highest installed solar capacities in the region, contributing to its goal of transitioning to a more sustainable energy mix.

Vietnam s photovoltaic power generation must be equipped with energy storage
