

# Western Japan Energy Storage Project

How do storage systems work in Japan?

Storage systems like BESS help keep power systems stable, especially when more electricity comes from solar and wind sources. Other projects in Japan include a municipal BESS project in Iida City, Nagano Prefecture. This small-scale system, with an installed capacity of 2 MW/4 MWh, is operated by a city-owned energy company.

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

How many battery storage projects will Stonepeak and CHC develop in Japan?

Stonepeak and CHC's energy storage platform will develop five new battery storage projects in Japan. These projects have a combined capacity of 348 megawatts (MW). The deals were finalized under Japan's Long-term Decarbonization Auction. These projects were selected as part of Japan's latest long-term auction focused on low-carbon energy.

Why are battery storage projects growing in Japan?

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity.

What projects are being done in Japan?

Other projects in Japan include a municipal BESS project in Iida City, Nagano Prefecture. This small-scale system, with an installed capacity of 2 MW/4 MWh, is operated by a city-owned energy company. It is used to stabilize power from local solar panels and support community resilience.

Why did Japan announce a 10MW power supply re-registration?

The announcement comes ahead of rule changes in the Electricity Business Act which governs Japan's electricity sector, through which grid-connected BESS assets of 10MW or higher output will be eligible from next year to register as generation resources for participation in trading opportunities like day-ahead markets.

6 days ago; The renewables-rich Hokkaido and Kyushu TSO areas saw the largest number of awarded projects with nine and six, respectively. Four were awarded in the Tokyo TSO area, ...
