

What equipment do you need for solar power generation

What equipment do I need to go solar?

You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), especially if you live in an area that doesn't have net metering.

How do I choose a solar energy system?

Knowing the different parts of a solar power system is the first step to choosing the best one. A grid-tied solar energy system includes solar panels, inverters, racking, a net meter, and a solar performance monitoring system. You'll need additional solar battery storage and a charge controller for hybrid and off-the-grid systems.

What kind of solar power system would be best for my home?

What kind of solar power systems would be best for your home depends on which features you're looking for. If you want to reduce your electricity bills using renewable energy, a grid-tied photovoltaic (PV) solar power installation may be right for you.

Do you need a storage battery for a solar system?

Storage batteries also allow a PV system to operate when the electric grid is not available. If you want your solar panels to operate during a power outage, you need to pair them with a solar battery. Hybrid solar systems and off-grid systems both use solar energy storage.

What are the different types of solar energy systems?

There are three main kinds of solar energy systems: Grid-tied Solar Systems: The most common solar panel design for residential applications; the house is plugged into the local electrical grid so it can draw power from the utility company when the solar panels aren't generating enough energy to power the entire household.

What are the components of a solar panel system?

Solar cells are the main components of a solar panel system - they convert sunlight into electric energy. Solar Panels exist in all types of solar energy systems. Solar panels consist of solar cells which are connected together to form solar arrays. Several well-known solar power companies include JinKo Solar, SunPower, Longi Solar, and LG.
