

# Where to install battery cabinets

How do I install a battery storage system?

install battery storage systems  
**INSTALL YOUR SYSTEM**  
The first thing to do when having a battery storage system installed is to ask to see the installer's Clean Energy Council Accredited Installer card. This shows that the installer is qualified to install your battery storage system.

Where can a battery be installed?

Batteries are usually installed outside or in a utility room (e.g. garage or basement) as they vent hydrogen when charged. Some batteries (usually lithium batteries) are designed to be wall mounted inside a herproof enclosure, though you should check the manufacturer's instructions.

Should batteries be installed inside or outside?

Batteries can be installed inside or outside. You may also choose to install multiple batteries to increase your storage capacity and are usually installed outside or in a utility room (e.g. garage or basement) as they vent hydrogen when charged. Some batteries (usually lithium batteries) are designed to be wall mounted inside a herproof enclosure.

How long does it take to install a battery storage system?

If you are qualified to install your battery storage system, the installation process for a battery storage system is usually very straightforward and only takes around 1-2 days (unless you are having a large system installed).

Can a battery be installed in a living room?

Batteries should be installed in a well-ventilated area and not be adjacent to heat or ignition sources. Batteries cannot be installed in a habitable room, such as a living room or bedroom. However, if you want to install a battery in a non-habitable room, such as a garage, you may need to consider ventilation. These are all factors to consider when installing a battery.

Can I move my battery storage system to a new home?

Once a battery storage system is installed to the new standard, you won't be able to reinstall it. Therefore, while it is technically possible to move your battery storage system to a new residence, you should check before you move that you will be able to reinstall the system. If the system is to be moved, it must be carefully dismantled and reinstalled.
