

# **Who is the company that uses wind and solar hybrid technology for Namibia's communication base stations**

What is Namibia's solar energy project?

This project, commissioned in 2014, was a significant milestone in Namibia's solar energy journey. The Omburu solar plant generates clean, renewable energy and contributes to reducing the country's reliance on imported electricity.

What is Namibia doing with green energy?

Namibia plans to establish an integrated, thriving, green ecosystem across southern Africa. Shared green energy infrastructure will unlock new synergies, and Namibia will use green energy to further existing manufacturing, mining and minerals processing industries.

Is solar power a good option for Namibia?

Solar power holds immense potential for Namibia. The country enjoys one of the highest levels of solar radiation in the world, with the southern regions of Namibia receiving more than 3,000 hours of sunlight annually. This makes solar energy an ideal solution for addressing Namibia's energy needs. 1. The 5 MW Solar Power Plant at Omburu

What is Namibia's first large-scale solar power plant?

1. The 5 MW Solar Power Plant at Omburu One of the first large-scale solar power plants in Namibia is the 5 MW solar power plant located at Omburu, in the Erongo Region. This project, commissioned in 2014, was a significant milestone in Namibia's solar energy journey.

Why is Namibia suited to green hydrogen production?

Namibia is uniquely positioned to develop green hydrogen at scale and at a low cost compared to most other countries, due to a combination of a very clear Government strategy, abundant natural resources, political stability and attractive investor landscape.

Why is Namibia a scalable country?

Incomparable scalability, due to high land availability- 100% owned by GRN: Namibia is a vast and sparsely populated country (the second least populated country globally) meaning there are large swathes of uninhabited and undeveloped land, with co-located solar and wind resources.

Key projects include Namibia's \$10 billion flagship Hyphen Hydrogen Energy project, in partnership with Enertrag and Nicholas Holdings Limited, which looks to produce 350,000 tons of green ...
