

Yard Onsite Energy Solar

What is a ground-mounted solar power system?

A ground-mounted solar power system is just what it sounds like - a system of solar panels that are mounted on the ground on your property, rather than on the roof of your house. A ground-mounted solar power system is just what it sounds like - a system of solar panels installed at ground level, rather than on the roof of your house.

What is the difference between a ground-mounted and a rooftop solar system?

With ground-mounted installations, you have the flexibility to work with solar panels of any size, including large 'commercial' modules featuring 72 cells (or 144 half-cells) or more, whereas rooftop systems are typically restricted to 60-cell panels which are smaller and lighter.

Are ground-mounted solar panels a good alternative to rooftop solar?

Ground-mounted solar panels are a great alternative for customers who want solar - but don't have a roof that's suitable for them. On top of being an alternative to rooftop solar, ground-mounted solar systems can be used on farms, in your garden, and more!
